CORE SKILLS

LANGUAGES

C/C++, Python, Java, JavaScript, TypeScript, PHP

WEB

React, Next.js, Node.js, NestJS, Vue.js, Tailwind, Vite

DATA / AI

PostgreSQL, data analysis, RAG/LLMs, n8n

DEVOPS / CLOUD

Git, Docker, Kubernetes, AWS, GCP

EMBEDDED

Arduino, ESP32, Raspberry Pi

LANGUAGES

English Professional

Persian Native

Computing Science @ Simon Fraser University | Minor in Mathematics

PROFILE

Full-stack software engineer with 3+ years of experience delivering web, backend, testing, automation, and infrastructure solutions from development through production. Hands-on with TypeScript/Python systems, AI automation, cloud/container tooling, and embedded systems.

EXPERIENCE

- BrightGo**

Jan 2025 - Jan 2026

Remote

Software Developer / Mid-level

 - Implemented AI-driven marketing automations for lead qualification and insights, contributing to 98% of the annual target.
 - Standardized infrastructure, deployment, and container management, reducing software/process costs by 45%.
 - Designed scale/performance tests, debugged customer issues, and contributed across GUIs, APIs, and an AI-oriented productivity framework.
- TANSCO**

Jan 2023 - Jan 2024

Vancouver, BC

Network Ops Technician / Mid-level Full Stack

 - Delivered full-stack systems with TypeScript, JavaScript, Next.js, React, PostgreSQL, Strapi, PHP APIs, and internal services while maintaining production IT infrastructure.
 - Built ML/AI solutions, n8n automations, and Python data pipelines; modernized a legacy IP-camera security system.
 - Led client technical training and implemented automated tests to improve reliability and supportability.
- Math / Technology Tutor**

Apr 2023 - Jun 2026

Burnaby, BC

Technology Instructor

 - Taught K-12 programming logic, basic computing, and computer support; created practical learning materials, workshops, and coding challenges.

SELECTED PROJECTS

- RISC-V Emulator** C

Built a disassembler/emulator that decodes machine instructions, executes several dozen RISC-V instructions, supports tracing, and enables register inspection for debugging.
- Line Follower Robot** ARDUINO / C++ / PID

Built an autonomous robot using five IR sensors, differential servo control, stop/lost-line handling, and optional Bluetooth-based real-time PID tuning.
- Off The Menu** JAVA / SWING

Created a top-down 2D tile-based arcade game from scratch in Java/Swing without a game engine.

EDUCATION

- Simon Fraser University**

Expected Sep 2027

B.Sc. Computing Science | Minor in Mathematics
